Energy Technology Gateway

**Renewables,  
Energy Optimisation  
& Energy Storage**

[www.creditgateway.ie](http://www.creditgateway.ie)

**CREDIT Technology Gateway**  
delivers near to market solutions  
for business and industry across  
the energy sector in Renewables,  
Energy Storage and Energy  
Optimisation

DELIVERING INNOVATION, EXPERTISE AND SOLUTIONS FOR IRISH INDUSTRY THROUGH:

## TECHNICAL CONSULTANCY

**CREDIT Technology Gateway** is a key enabler of innovation working together with business, industry and communities to cultivate a continuous innovation cycle creating a journey from concept to reality for products and services.

## RESEARCH AND DESIGN

**CREDIT Technology Gateway** has the hands-on expertise and extensive knowledge of new and emerging energy trends to deliver tailored R&D programmes that combined with the access to leading facilities and expertise, test and scale up new developments and technologies, to accelerate innovation and provide access to new markets.

## PROTOTYPE AND SCALE MODEL TESTING

**CREDIT Technology Gateway** can support business to take a structured and iterative approach to building prototypes and testing their new ideas and developing them as they go.

A very interesting study (with CREDIT Technology Gateway through the Enterprise Ireland Innovation Voucher Scheme) on developing an energy baseline for Lambay Island and the impact that the proposed new distillery will have on the island . . . let us hope to see this distillery in creation

**Yonael Bernard**, Production Manager,  
Lambay Irish Whiskey Company

Engagement with the CREDIT Technology Gateway energy research team through the Innovation Voucher scheme had significant impact on PureHeat Technologies in terms of delivering a robust analysis and report that gave validation of the performance of our flagship product

**Jimmy Gargan**, Founder and Director  
PureHeat Technologies

CREDIT Technology Gateway can leverage many forms of support funding (Enterprise Ireland, Invest NI, InterTradeIreland etc) for your research collaboration and is able to draw on an array of skills and expertise to address the necessary research and technical capabilities to deliver strategic solutions and transformational change across the energy challenge.
